Poland's strike  
suspended

By RUTH E. GRUBER

WARSAW, Poland, UPI - The Solidarity Independent union tonight suspended its call for a general strike threatened for Tuesday and ordered a top-level meeting to consider calling off the walkout altogether.

The official news agency PAP announced the suspension following seven hours of "last chance" talks between the government and the union.

It said a full leadership meeting of the union's national committee will be held in Gdanek Tuesday to make a decision whether to call off the strike definitively.

## Oscars delayed

By VERNON SCOTT

HOLLYWOOD UPI - The Academy of Motion Picture Arts and Sciences Monday postponed the annual Oscar presentations because of the shooting of President Reagan, who had been scheduled to open the ceremony Monday night with a videotaped speech.

The ceremony was put off for 24 hours until Tuesday night, ABC-TV announced. It was the third time the ceremony had been postponed. It was postponed in 1938 for a week because of disastrous flooding and for two days in 1968 because of the assassination of black civil rights leader Martin Luther King.

# President shot; in good condition

By DEAN REYNOLDS

WASHINGTON UPI - President Reagan was shot in the chest Monday by a gunman firing from close range. Reagan was reported in good condition and underwent surgery to remove a small caliber bullet.

The gunman, identified by the Secret Service as John Warnock Hinkley Jr., 25 of Evergreen, Colo., also critically wounded White House press secretary James Brady.

A Secret Service Agent and a Washington, D.C. policeman were also wounded in the shooting outside a downtown Washington Hotel.

REAGAN POLITICAL aide Lyn Nofziger said the president was shot "once in the left chest" but was conscious, talking and in stable condition.

Reagan walked into George Washington University Hospital under his own power and underwent an operation to remove the bullet.

The gunman, whose motives were not immediately known, was tackled and wrestled to the ground by Secret Service and police officers. Hinkley was arrested and taken to District of Columbia police headquarters.

BRADY, HIS head bleeding, was rushed to the hospital and a White House aide said glumly "it doesn't look good." He was reportedly in surgery and in extremely critical condition.

Reagan's top cabinet officers gathered at the White House where Secretary of State Alexander Haig said he had informed foreign leaders of the shooting. Haig said "as of now I am in control here in the White House" pending the return of Vice President George Bush, who was returning from a trip to Texas.

Nancy Reagan, who was not with Reagan at the time of the shooting, went to his side in the hospital.

"THE PRESIDENT was holding his left chest with his arm, his head was bowed," said Willis King, a witness at the hospital when Reagan walked in.

"There was blood on his shirt. His coat was open and I could see the blood...it was running down his shirt."

The wounded Secret Service agent was tentatively identified as Timothy J. McCarthy, 32, of Chicago. The policeman was identified as Thomas K. Delahanty, 45, a 17-year veteran of the Washington police force, who was listed in serious condition with a bullet lodged in his neck.

Reagan had just left the hotel after giving a speech and was smiling and

The Daily Guardian file photo

President Ronald Reagan was shot yesterday after a speech in Washington D.C. The President was reported in good condition and was not in any danger at any time, doctors reported.

waving to onlookers when his face froze in horror as shots rang out.

BEFORE HE could respond the Secret Service agent, a step behind him put one hand on the president's shoulder, another around his waist, bent him double and stuffed him into the back seat of the presidential limousine.

FBI officials said the assailant had used a "small caliber" weapon.

Reagan reportedly did not initially realize he was shot and an aide said he walked into the hospital on his own. But Brady and the two officers, who were apparently caught in the line of gunfire, were more seriously injured.

Reagan was shot as he was leaving the side entrance of the Washington Hilton Hotel after delivering a speech to the convention of the Building and Construction Trades Union at the Washington Hilton.

ALL THREE television networks were filming Reagan as he was shot, apparently by a gunman standing behind the row of cameramen and about 10 to 15 feet from the president.

Brady and deputy White House Chief of Staff Mike Deaver were beside Reagan as he left the hotel. Deaver had just moved out of range as the man opened fire, but Brady and the two officers were hit.

While Brady and the two officers fell to the sidewalk, there was no immediate indication the president was hit. His deputy press secretary Larry Speakes said initially Reagan was unhurt, and it was not until the president arrived at the hospital that it was revealed he had been wounded.

"YOU COULD see the feeling on his eyes," said a young man who witnessed the shooting.

"Reagan was in a state of shock...no fear. It will be etched on my eyes forever."

Witnesses reported hearing between three and five shots, all fired in rapid succession from the man who was dressed in a tan raincoat and a suit. The shot scattered the people around the president many hitting the ground while the agent and police officers tackled the gunman.

It was the first attempted assassination of an American president since Sept. 22, 1975, when Sara Jane Moore fired a single shot at Gerald Ford as he left the St. Francis Hotel in San Francisco.

THE LAST attempt on a president's life in Washington, happened when a group of Puerto-Rican Nationalists attempted to storm Blair House while President Truman was living there in 1950.

Reagan received a scare on the first day of his 1976 campaign when a man in Florida crowd drew a toy pistol on him. The man was arrested.

# Wright State works on research park

By MATT KENNEDY  
Assistant News Editor

The creation of the Miami Valley Research Park, a project to bring high technology research to the area, is being worked on by Wright State University and three other local institutions.

"Representatives of Wright State University, the University of Dayton, Sinclair Community College and the Air Force Institute of Technology have worked together for more than two years to establish the Miami Valley Research Park," Wright State President Robert Kegerreis said.

Plans for the research park were revealed March 11 when Governor James A. Rhodes announced his support for a bill submitted to the General Assembly giving the Miami Valley Research Foundation 670 acres of state land in Kettering for the park.

THE MIAMI Valley Research Foundation is composed of Wright State, U.D., and Sinclair. The foundation's purpose is the creation of the park.

The 670 acres are located near the intersection of Patterson Road and County Line Road. The land was once used for the Dayton Mental Health Center farm, growing food for the state hospital.

Kegerreis called the 670 acres "an absolute prime piece of property...This was our number one choice." He said the designated area is larger than the

university's campus.

Exactly what the Miami Valley Research Park will contain, no one is sure.

"When a research-park concept is announced, there is an immediate call for something to be concrete, for something to happen immediately," said Sinclair President David Ponitz.

PONITZ SAID, however, "there's a lot of between problems that need to be solved. And what people look upon as progress is a building going up as a symbol, which is much less important than the cooperation between the higher education institutions of the area and the scientific community.

And that's much harder to do than build a building," Ponitz said.

"This is a very, very advance stage; we don't even have the land yet," said Kegerreis.

"We've looked at research parks and research concentrations all over the country, from Boston to California...It is impossible for any of us today to give a picture of what the research park would eventually be were it to be successful."

Kegerreis said all the research parks they've looked at have turned out differently than what was originally planned for them.

Ponitz said the park's growth could be a "very hopscotch pattern...Research parks are different, and you can't say this will be a copy of another. You can't subscribe which scientific groups

Daily Guardian photo by Scott Kiesel

The former state farm located on the land proposed for a new research park.

might or might not be involved... Nothing in life is simple and this project proves it."

ALTHOUGH THERE is no way to determine what the park will be like, the research foundation is using a model. The model is a research park in North Carolina called the Research Triangle Park. Kegerreis said it was five years after the Research Triangle Park started before the first building was under construction.

Kegerreis called this park "by far the most effective park ever operated. We won't ever rival the Research Triangle, because we have missed certain opportunities."

The Research Triangle Park is now reportedly worth \$500 million in buildings and has an annual payroll of over \$400 million.

Kegerreis said compared to the Research Triangle's beginning, "we are not starting from zero... We've had some people tell us, compared to the Research Triangle in North Carolina when it started, we in this area are light years ahead."

The idea behind starting the research park, Kegerreis said is "setting aside a specific location for advance research whether it's high-technology, social research, or behavior research, to make it easier for an area like Dayton to attract such (research groups) to the town."

"THE PARK will highlight what high technology is," Ponitz said. He added the park will stabilize the community's opportunities for getting more jobs.

Kegerreis said the research park could provide Wright State faculty "a considerable larger opportunity for corroboration, research, contracts and grants...It doesn't mean we are going to be asking faculty people to the research park. Any interaction, any engagement in research in the research park on the part of our faculty will be voluntary." Kegerreis also said the research park will make the Dayton area an easier place from which to recruit faculty members.

Ponitz said, "I think the name Sinclair Community College ought to answer your question," why Sinclair is involved.

"We take very seriously the fact that this is a community college...We're concerned with the hopes, dreams, aspirations, frustrations, and the solving of problems for this community."

"THIS ISN'T suggesting our students won't get great benefit in terms of having the opportunity to see high technology in work," Ponitz said.

Another institution involved in the project, Kegerreis said, is the Air Force Institute of Technology (AFIT). Lynn Wolaver, AFIT's dean for professional research and development said AFIT's

mission is educating logisticians, scientists and engineers for the Air Force and advancing knowledge through aerospace research.

University of Dayton President Brother Raymond Fitz could not be reached for comment.

Kegerreis said the research park will not be subsidized by the university's budget. However money from the university will go indirectly toward the park.

"I'm going to spend time on it (the park), and I'm a Wright State employee," Kegerreis said.

AT ALL the research parks the foundation looked at, "there are far more failures than successes," Kegerreis said.

"We're going to need unprecedented cooperation from federal, state, township, corporations, two counties, and the people who are needed in this project. It's going to take an enormous expenditure of energy to make this thing work well," Kegerreis said.

"If we don't get good cooperation, if we don't get some combination of public and private funding, if the recession increases or decreases... We may run low on energy, we may run high on disappointment. So it's possible it won't work. But if we get the land, I think we have a fighting chance. Without the land we don't have any place to go," Kegerreis said.

# Stars shine

## UCB Cinema offers selection of 27 films this spring

"See the stars shine this spring" is the promotional ploy the University Center Board Cinema organization is pasting up for the forthcoming warm spring months.

And why not? UCB Cinema has a total of 27 movies lined up for spring quarter including a list of over 35 major film stars and motion picture directors.

Francis Ford Coppola's spectacular Vietnam war drama, *Apocalypse Now*, will set the UCB Spring Movie Entertainment schedule off to a dynamic start April 3, 4, and 5 in Oelman 112. The highly acclaimed and controversial film will be shown in cinemascopes at the special show times, 6 and 9 p.m. Friday and Saturday and 8 p.m. Sunday. Admission is \$1.50.

"THIS SPRING quarter we plan to offer the most complete and yet versatile list of movies ever offered at Wright State University," explained Don Irven, Director of UCB Cinema.

"We have everything from Walt Disney's colorful animation to the popular fad of the 1950's - 3-D movies. Blockbuster hits like *Private Benjamin* and *Caddyshack* along with our own Dayton premiere of a never before released 1980 Robert Altman film entitled *Health* starring Carol Burnett, make our season a film fare worth investigating.

Besides the weekend movies, UCB is offering for the first time weekly midnight movies.

"OUR THREE experimental midnight films in the winter quarter were so successful that we have decided to expand to a weekly program," Irven said. "We have included some of the

most popular midnight cult films along with a variety of classic comedy and fun films guaranteed to provide some good times into the wee hours of the night."

Movies included in the list of "midnight movie madness" are *The Rocky Horror Picture Show*, Ralph Bakshi's *(American Pop) Wizards*, *Creature from the Black Lagoon*, in 3-D, the explicit adventures of *The Cheerleaders*, and *Dawn of the Dead*, George Romero's gory tale of survival.

This weekend, "the midnight movie madness" film series opens with one of the biggest box office hits recounting the 1978 concert tour of comedian Richard Pryor - *Richard Pryor Filmed Live in Concert*.

IF TICKETS for the midnight movies are purchased in advance, before 10 p.m. the evening of the movie, the price is only \$1.00; otherwise, the admission price is \$1.50.

To pick up UCB Cinema Movie Entertainment brochures, stop by the University Center, room 020 or 008B, or any information outlet on campus.

For additional information about UCB Cinema and the spring quarter movie schedule or how to join this organization, call the University Center Board office at 873-2700 or stop by room 008B in the University Center.

So well and you can qualify for Army ROTC courses in the fall. Be academically well, and you may be heading back to Wright State with a full-tuition scholarship. Check on this no-obligation opportunity today to be all you can be!

# Fear and Loathing win intramurals

By JIM DESIMIO  
Guardian Sportswriter

## Sports

Fear and Loathing beat Stinkies, 53-50, on Thursday, March 12, to win the intramural men's league basketball crown for the second consecutive year.

Perhaps Fear and Loathing should change its name to Fear and Anxiety, considering the way they have played throughout the championship tournament.

In the opening round, Fear and Loathing found the Court Jesters no laughing matter. The game went into overtime, and was still tied at the end of the three-minute OT period. The game was forced into sudden-death, and Fear and Loathing scored the first basket to win, 50-48.

FEAR AND Loathing's next

opponent was the Hornets. This game also went into overtime, but Fear and Loathing prevailed. When the final buzzer sounded, the Hornets had lost, 49-45.

Fear and Loathing's next game, against Swank's Big Daddy Swingers, didn't go into overtime, but was decided after time had expired on the game clock.

Swank's had the game all but wrapped up with seven seconds left, a two-point lead and a man at

the free throw line shooting a ope-and-one. He missed the crucial first shot, however, and Fear and Loathing got the rebound, calling time out with six seconds remaining.

FEAR AND Loathing got the ball to Bob Grote, the assistant Raider basketball coach, who put up a shot just as the buzzer sounded. The shot went in; and Grote, who had been fouled on the play, sank a free throw with no time showing on the clock to

win the game, 60-59.

As opposed to Fear and Loathing, Stinkies didn't have much trouble in the preliminary rounds.

They drew a bye in the first round, and then outscored the Otis's, 53-43, in the next round. In their semifinal game, Stinkies dumped Doug's Team, 60-45.

The final game was characteristic of the previous Fear and Loathing games. In the first half, the lead changed hands 12 times. Stinkies make a hoop at the end of the period, which gave them a 20-19 lead at halftime.

THE SECOND half was also nip and tuck. Fear and Loathing held a 49-48 lead with 20 seconds left in the game, when their team captain, Bill Lent (Better known as "Syracuse"), sank a pair of free throws.

Seconds later, Fear and Loathing stole the ball, and "Syracuse" swished a two-pointer to sew up the game. Stinkies made a bucket in the closing seconds to make the final score 53-50.

After the game, Fear and Loathing's captain, "Syracuse" Lent, said, "It was pure gonzo basketball."

LENT THEN predicted that Fear and Loathing would win the intramural all-sports award for 1980-81, and said, "Look for us in softball."

As a reminder, there is still time to sign up for the intramural softball season. There are men's teams, women's teams, co-recreational teams, and an Alumni/Faculty/Staff league, the deadline date for registration in all leagues being Friday, April 3.

To Julie - whose expressions wouldn't fit with those of little girls  
Ofc. of my creative way  
is such a random thing to come  
to me in time of need to have  
and, having, no't to use.

As I use, in former times,  
believing use to "have" and what  
I had was true to me, of course,  
and very useful too.

Once, I heard a fable of  
a goose of golden eggs and how  
it was that having one, I thought,  
was how to have its fruit.

As I am, I say but wish  
to find my random way through all  
the things I have and know about  
to be a fruitful goose.

• Having (believing) was easy, unlike understanding,  
it didn't require building.
